SUBJECT INDEX

Absolute Cesaro summability
  Generalized absolute Cesaro summability of a Fourier series 163
Additive forms
  Small fractional parts of additive forms 147
Affine normal subrings of $\mathbb{C}[X, Y]$
  Graded subrings of $\mathbb{C}[X, Y]$ 209
Algebraic cycles
  Cycles on the generic abelian threefold 191
Algebraic groups
  Discrete subgroups of algebraic groups over local fields of positive characteristics 127
Ampleness
  Mumford's example and a general construction 197
Analytic function
  On the gap between two classes of analytic functions 123
Anisotropy
  Thermohaline convection with cross-diffusion in an anisotropic porous medium 93
Aperiodic ring
  Aperiodic rings, necklace rings and Witt vectors-II 7
Asymptotic behaviour
  Asymptotic analysis of some nonlinear problems using Hopf-Cole transform and spectral theory 181
Asymptotic expansions
  Asymptotic expansions of the Mehler-Fock transform 175

Canonical measures
  Canonical measures on the moduli spaces of compact Riemann surfaces 103
Cantor sets
  Dynamics on Ahlfors quasi-circles 113
Cayley transform
  On unbounded subnormal operators 85
Closed oriented surfaces
  Quasiminimal invariants for foliations of orientable closed surfaces 27
Compact Riemann surfaces
  Canonical measures on the moduli spaces of compact Riemann surfaces 103
Compressibility
  On orbit equivalence of Borel automorphisms 255
Critical growth
  Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Cross-diffusion
  Thermohaline convection with cross-diffusion in an anisotropic porous medium 93

Denjoy counter example
  Dynamics on Ahlfors quasi-circles 113
Discrete subgroups
  Discrete subgroups of algebraic groups over local fields of positive characteristics 127

Eigenvalue problem
  Asymptotic analysis of some nonlinear problems using Hopf-Cole transform and spectral theory 181
Erdelyi-Kober operator
  Fractional integral formulae involving a general class of polynomials and the multivariable H-function 169

Finite length
  Classification of isolated complete intersection singularities 17
Finite simple groups
  Ramifications of Ramanujan's work on η-products 221
Fourier series
  Generalized absolute Cesaro summability of a Fourier series 163
  On the integral modulus of continuity of Fourier series 249
Fractional integral formulae
  Fractional integral formulae involving a general class of polynomials and the multivariable H-function 169
Fractional parts
  Small fractional parts of additive forms 147
Functional analysis
  A softer, stronger Lidskii theorem 75
Fundamental domains
  Discrete subgroups of algebraic groups over local fields of positive characteristics 127

General class of polynomials
  Fractional integral formulae involving a general

class of polynomials and the multivariable H-function 169
Generic abelian varieties
Cycles on the generic abelian threefold 191
Generic curves
Cycles on the generic abelian threefold 191
Graded affice subrings
Graded subrings of $\mathbb{C}$ [X, Y] 209

Hadamard product
On the gap between two classes of analytic functions 123
Heath-Brown's version
Small fractional parts of additive forms 147
Hodge bundle
Canonical measures on the moduli spaces of compact Riemann surfaces 103

Infinite transversely isotropic body
Steady-state thermoelastic stresses in an infinite transversely isotropic medium containing an external circular crack 263
Initial boundary value problem
Asymptotic analysis of some nonlinear problems using Hopf-Cole transform and spectral theory 181
Integral extension
A note on the coefficient rings of polynomial rings 217
Integral modulus of continuity
On the integral modulus of continuity of Fourier series 249
Intersection singularity
Classification of isolated complete intersection singularities 17

Kaplan classes
On the gap between two classes of analytic functions 123
Katok bound
Quasiminimal invariants for foliations of orientable closed surfaces 27
Kernel function
On Shintani correspondence 235

Laplacian
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Leech lattice
Ramifications of Ramanujan's work on η-products 221
Legendre function
Asymptotic expansions of the Mehler-Fock transform 175
Lidskii theorem
A softer, stronger Lidskii theorem 75
Local fields
Discrete subgroups of algebraic groups over local fields of positive characteristics 127

Map germs
Classification of isolated complete intersection singularities 17
Mathieu group M_{24}
Ramifications of Ramanujan's work on η-products 221
Mehler-Fock transform
Asymptotic expansions of the Mehler-Fock transform 175
Minimal normal extension
On unbounded subnormal operators 85
Minimal primes
A note on the coefficient rings of polynomial rings 217
Minimal set
Dynamics on Ahlfors quasi-circles 113
Modular forms
Transcendence conjectures about periods of modular forms and rational structures on spaces of modular forms 231
Moduli spaces
Canonical measures on the moduli spaces of compact Riemann surfaces 103
Multivariable H-function
Fractional integral formulae involving a general class of polynomials and the multivariable H-function 169

Necklace ring
Aperiodic rings, necklace rings and Witt vectors-II 7
Non-quasiminimal invariants
Quasiminimal invariants for foliations of orientable closed surfaces 27
Nonlinear parabolic equation
Asymptotic analysis of some nonlinear problems using Hopf-Cole transform and spectral theory 181
Normal path inequality
A softer, stronger Lidskii theorem 75

Odometer transformation
On orbit equivalence of Borel automorphisms 255
Orbit equivalence of Borel automorphisms
On orbit equivalence of Borel automorphisms 255
Orientable foliations
Quasiminimal invariants for foliations of orientable closed surfaces 27

P-triples
Quasiminimal invariants for foliations of orientable closed surfaces 27

Palais-Smale condition
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Periods
Transcendence conjectures about periods of modular forms and rational structures on spaces of modular forms 231
Polynomial ring
A note on the coefficient rings of polynomial rings 217
Porous medium
Thermohaline convection with cross-diffusion in an anisotropic porous medium 93
Positive characteristics
Discrete subgroups of algebraic groups over local fields of positive characteristics 127
Products of η-functions
Ramifications of Ramanujan's work on η-products 221

Quasi-circle
Dynamics on Ahlfors quasi-circles 113
Quasiminimal invariants
Quasiminimal invariants for foliations of orientable closed surfaces 27

Rational conjugacy
Zassenhaus conjecture for A_5 1
Rational structures
Transcendence conjectures about periods of modular forms and rational structures on spaces of modular forms 231
Riemann zeta function
Transcendence conjectures about periods of modular forms and rational structures on spaces of modular forms 231
A generalisation of the Riemann zeta-function 155
Riemann-Liouville operator
Fractional integral formulae involving a general class of polynomials and the multivariable H-function 169
Ring of invariants
Graded subrings of $\mathbb{C}[X, Y]$ 209
Rotation number
Dynamics on Ahlfors quasi-circles 113

Semilinear Dirichlet problem
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Shimura lifting
On Shintani correspondence 235
Siegel domains
Discrete subgroups of algebraic groups over local fields of positive characteristics 127
Siegel symplectic metric
Canonical measures on the moduli spaces of compact Riemann surfaces 103
Spectral variation
A softer, stronger Lidskii theorem 75
Stability
Mumford's example and a general construction 197
Thermohaline convection with cross-diffusion in an anisotropic porous medium 93
Stress intensity factor
Steady-state thermoelastic stresses in an infinite transversely isotropic medium containing an external circular crack 263
Sub-critical growth
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Super critical growth
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49
Symplectic group action
Cycles on the generic abelian threefold 191

Thermohaline convection
Thermohaline convection with cross-diffusion in an anisotropic porous medium 93
Toeplitz and Bergman operators
On unbounded subnormal operators 85
Torsion unit
Zassenhaus conjecture for A_5 1
Transcendence
Transcendence conjectures about periods of modular forms and rational structures on spaces of modular forms 231

Unbounded subnormal operator
On unbounded subnormal operators 85
Unit disc
Positive solutions of the semilinear Dirichlet problem with critical growth in the unit disc in $\mathbb{R}^2$ 49

Vector bundles
Mumford's example and a general construction 197
Verschiebung and Frobenius operators
Aperiodic rings, necklace rings and Witt vectors-II 7

Waldspurger result
On Shintani correspondence 235
Weakly minimal sets
Quasiminimal invariants for foliations of orientable closed surfaces 27
Weyl's estimate
Small fractional parts of additive forms 147
Witt vectors
Aperiodic rings, necklace rings and Witt vectors-II 7

Zassenhaus conjecture
Zassenhaus conjecture for A_5 1
